**TITLE: STRUCTURE OF ARRANGEMENT OF
ELECTRICAL, FITTING BOX**

PUBN-DATE: February 9, 1993

INVENTOR-INFORMATION:

NAME

KENMOTSU, TAKESHI

INT-CL (IPC): B60R011/00, B60R007/04

US-CL-CURRENT: 224/275, 224/542 , 224/929

ABSTRACT:

PURPOSE: To install electric fitting items concentrically adjacent to the driver seat, perform inspection/repair works easily, and reduce the man-hours for works.

CONSTITUTION: A computer for control of car, a diag. monitor, and other electrical fitting items are accommodated in a box 5 which is installed with the overpart opened at the floor surface between the driver seat 1 and assistant seat 2, and a console box 6 of over laid lid structure
